Subject: Expo

Hi Loren,

Thanks for the Expo Phase II extension. You probably have it covered, but If you still need help with typing the scoping comments I will have some free time mid next week.

Also, I'm not sure if I faxed my preference on which route Phase II should proceed. I decided on B) continue along the Venice/Sepulveda route.

DEADLINE Friday, March 11, 2011

To Whom It May Concern,

My husband and I bought our home, did 3 years worth of remodeling/renovation and had our first child in our home. We did this with the sole purpose of living here for many years to come, while our child attends Overland Elementary, down the street.

The neighborhood is a very special place, where not only do people say hello, you can't go into your home without speaking to one another. Everyone looks out for one another.

If a train goes in behind our back yard, not only will the makeup of the neighborhood most definitely change, with many people planning on moving, the noise levels, traffic congestions and most likely permit street parking will go into effect, not to mention that we will have to walk our daughter to school everyday across working train tracks and oncoming trains that were never planned for movement of people, only freight, which moves much slower and much more infrequently. In addition to all of the listed, we are also very aware of previous construction issues that the light rail has faced in addition to light rail accidents. If there was an issues on Overland and an oncoming train was involved in an accident, it could have deadly effects on either the school or the neighboring houses or both. We are saddened by any decision to build in our backyard and would have never gone through with our current construction if we had known about a potential train in our backyard.

Sincerely,

████████████████████

To: lorenkosmont@gmail.com
Subject: Expo Phase II

Dear [REDACTED]

Thank you so much for all that you are doing for our neighborhood. My husband and I would like to express our opinion for the Phase 2 extension:

We prefer that the Phase II extension from Culver City to Santa Monica should:

CONTINUE ALONG THE VENICE/SEPULVEDA ROUTE!!!

Our concerns are safety and noise and the effect on Overland Elementary. What type of safety measures is the MTA planning to put in place in order to make certain that children do not play on or near the tracks. Also, is the MTA planning to sound proof the school with a sound wall or pay the cost of triple pane windows for those classrooms (which are special education) closest to the right of way? Will they be conducting an EIR that is different from the one done in 2000?

I would appreciate if you could hold a neighborhood meeting or let me know at what board meeting you will discuss the outcome of the scoping meetings.
Thank you again.

Sincerely,

[REDACTED]
